FAÇA SEU GIBI

The diagram illustrates the process of creating a comic book from a single sheet of paper. It is divided into three main sections:

- Top Section:** Shows the initial steps of folding a single sheet of paper. A hand is shown writing "PAG. 1" on the first page.
- Middle Section:** Displays two grids of comic panels. The left grid is labeled "FRENTE" and the right grid is labeled "VERSO". Each grid contains eight panels numbered 1 through 8, arranged in a 2x4 layout. Below these grids is a row of eight individual comic panels, numbered 1 through 8, showing a sequence of characters and scenes.
- Bottom Section:** Shows the final steps of folding the paper into a book format. The panels are arranged in a grid, and the paper is folded to create a book with a cover and pages.

PARA FINALIZAR, COLOQUE UM OU DOIS GRAMPOS NA LATERAL E CORTE AS PÁGINAS PARA SEPARÁ-LAS, COMO UMA REVISTA
